

*"...joint aid has enabled my cat to continue doing the important things in life."*

# joint aid *for* cats

**...the painless, economical aid for maintaining healthy joints.**

Unfortunately, it is a fact of life that the well being of many cats is compromised by the onset of stiff joints or uneasy movement at some point in their lives.

As a result, Joint Aid for Cats has been uniquely designed to utilise 11 naturally occurring "nutricines" (feed components with health benefits) to provide extra support to the normal wear and repair of cartilage, synovial fluid, tendons and joints in the skeletal structure, whilst aiding the natural anti-inflammatory actions of the cat's metabolism to help maintain flexibility of movement throughout its life.

## eleven

contains 11 naturally occurring nutrients:

- Chondroitin • Collagen
- Curcumin • Glucosamine
- Glutamine • MSM •
- Vitamin C • Antioxidants •
- Polar Lipids • Beta Glucans
- Galacto Lipid Emulsifiers

**100% natural**

## nutricines explained

The following, 11, naturally occurring nutricines are incorporated into Joint Aid for Cats to provide the very best support for your cat:

- **Chondroitin** - responsible for the resilience of cartilage as well as its formation and repair.
- **Collagen** - the main supportive protein of bone, cartilage and connective tissue which acts as the body's glue for adhering cartilage to bone, teeth to gums, etc.
- **Curcumin** - helps maintain the natural anti-inflammatory action of the cat's metabolism.
- **Glucosamine** - involved in the formation of tendons, skin, bones and ligaments and maintains the ability of cartilage to hold water in order to act as a shock absorber.
- **Glutamine** - supports the gut barrier and immune functions.
- **MSM** - essential for healthy connective tissue, joint function, cell replacement, enzyme activity as well as the immune system.
- **Oatinal™** - supplies natural **antioxidants, polar lipids, beta glucans and galacto lipid emulsifiers**, required to maintain gut cell integrity, maintain the lining of the gut, support the immune system and aid the absorption of nutricines, vitamins and trace elements.
- **Vitamin C** - involved in the natural healing process and is important to the immune system.

## technical information

**Product Analysis:** Protein: 14.0% Oil: 6.5% Fibre: 5.5% Ash: 5.0% **Contents:** Cooked Cereals: 43.0% Cereal Byproducts: 15.0% Byproducts of Sugar Production: 10.0% Forage Products: 10.0% Non GM Soya: 10.0% Oatinal™: 5.0% Chondroitin: 2.0% Glucosamine: 2.0% Vitamin C: 1.0% Glutamine: 1.0% MSM: 1.0%

## contact details

Joint Aid for Cats (part of The Aid Range™), is exclusively manufactured by:  
**Gro-Well Feeds Ltd.**, Hercules Way, Bowerhill Est., Melksham, Wilts, SN12 6TS, UK.
