the potential with joint aid plus

joint aid plus + Oatinol™

- Maintains flexibility of movement for performance horses.
- Aids the normal anti-inflammatory actions of the horses metabolism.
- Supports normal wear, tear and repair of cartilage and synovial fluid.
- Provides building blocks for natural replenishment.
- Maintains a high level of absorption of 11 active components.
- Pelleted, palatable and easy to administer.

contains **eleven**
naturally occurring nutrients:

- Chondroitin • Collagen •
- Curcumin • Glucosamine •
- Glutamine • MSM • Vitamin C
- Antioxidants • Polar Lipids •
- Beta Glucans • Galacto Lipids

100% natural

Joint Aid Plus combines three areas of maintenance in one product to aid freedom of movement and soundness of joints.

antioxidants - The onset of restricted movement and stiffness are caused by the ageing process and the stresses inflicted at pressure points like the joints. Inflammation in synovial fluids and joint linings caused by strenuous exercise can increase the level of damaging free radicals present in the tissue cells of the joints.

Antioxidants maintain integrity within cells by stabilising these reactive free radical antagonists so the type of antioxidant is crucial for this process. Joint Aid Plus contains high levels of natural antioxidants called 'Tocotrienols' which are evenly spread in body membranes.

building blocks & natural anti-inflammatory -

- **Chondroitin** - responsible for the resilience of cartilage as well as its formation and repair.
- **Collagen** - the main supportive protein of bone, cartilage and connective tissue which acts as the body's glue for adhering cartilage to bone, teeth to gums, etc.
- **Curcumin** - helps maintain the natural anti-inflammatory action of the horses' metabolism.
- **Glucosamine** - involved in the formation of tendons, skin, bones and ligaments and maintains the ability of cartilage to hold water in order to act as a shock absorber.
- **Glutamine** - supports the gut barrier and immune functions.
- **MSM** - essential for healthy connective tissue, joint function, cell replacement, enzyme activity as well as the immune system.
- **Oatino™** - supplies natural *antioxidants, polar lipids, beta glucans* and *galacto lipid emulsifiers*, required to maintain gut cell integrity, maintain the lining of the gut, support the immune system and aid the absorption of nutrients, vitamins and trace elements.
- **Vitamin C** - involved in the natural healing process and is important to the immune system.

delivery system - The ability of the horse to absorb nutrients (feed substances that aid nutrition and health), is crucial for the effectiveness of the support that this product provides. Joint Aid Plus contains Oatino™, a source of galactolipids and natural emulsifiers that help maintain enzyme activity and absorption.

technical information - *Product Analysis:* Protein: 14.0% Oil: 6.5% Fibre: 5.5% Ash: 5.0% *Contents:* Cooked Cereals: 42.0% Cereal Byproducts: 15.0% Byproducts of Sugar Production: 10.0% Forage Products: 10.0% GM Free Soya: 10.0% Oatino™: 5.0% Sodium Bicarbonate: 1.5% Chondroitin: 2.0% Glucosamine: 2.0% Vitamin C: 1.0% Glutamine: 1.0% MSM: 1.0%

contact details - Joint Aid Plus (part of The Aid Range™), is exclusively manufactured by: Gro-Well Feeds Limited, Hercules Way, Bowerhill Estate, Melksham, Wiltshire, SN12 6TS, UK.

For feeding advice and all other enquiries, please contact:
Telephone: +44 (0)8700 600 670

how to feed

Joint Aid Plus should be mixed with the horse's normal feed at the following daily level:

all horses

125gms / day
or 1 measure (supplied)

- For continued support, please feed Joint Aid Plus on a daily basis.
- This product is tested and guaranteed free of caffeine and theobromine.
- Manufactured as a mini pellet for ease of use and minimum waste.
- Available in a 5kg bucket.
- Provides 40 days feeding from 1 x 5kg bucket.
- 12 months shelf life.

Universal Feed Assurance
Scheme Reg. #81.
